Northern Colorado Zero Suicide Implementation Training

Zero Suicide is a framework that helps healthcare organizations create a pathway to care that demonstrates their commitment to suicide prevention. The journey to 'zero suicides' begins with a commitment to culture change, followed by a practical set of evidence-based tools and strategies.

We Need Your Help To Become A Community With Zero Suicides

Over 120 residents of Northern Colorado died by suicide in 2016. National data indicate that over 30% of individuals were receiving mental health care at the time of their deaths by suicide, and 45% had seen their primary care physicians within one month of their deaths.

Join us on July 10th at a training offered to leaders at health and behavioral health care organizations by experts in the proven framework. Learn how to implement the Zero Suicide model and local resources that are available for ongoing support.

The Zero Suicide framework offers:

- ✓ A set of best practices and tools for health and behavioral health systems and providers
- ✓ A framework for systematic, clinical suicide prevention
- ✓ A focus on safety and error reduction
